EASTAN

BIO-TECHNOLOGY

Vision:

A Trustworthy Intelligent Manufacturing Industry Chain for Pet Food

Mission:

Ensure pets' food safety and health, bring pet owners peace of mind and joy, and build a healthy human-pet life.

Core Competitiveness:

Build an excellent industrial chain for three-dimensional customized services of pet food brands.

Values:

Customer-Oriented, Innovation & Efficiency, Pursuit of Excellence, Win-Win Cooperation

Qingdao Eastan Bio-technology Co., Ltd

Founded in 2004, we are located in Qingdao, a beautiful coastal city in eastern China.

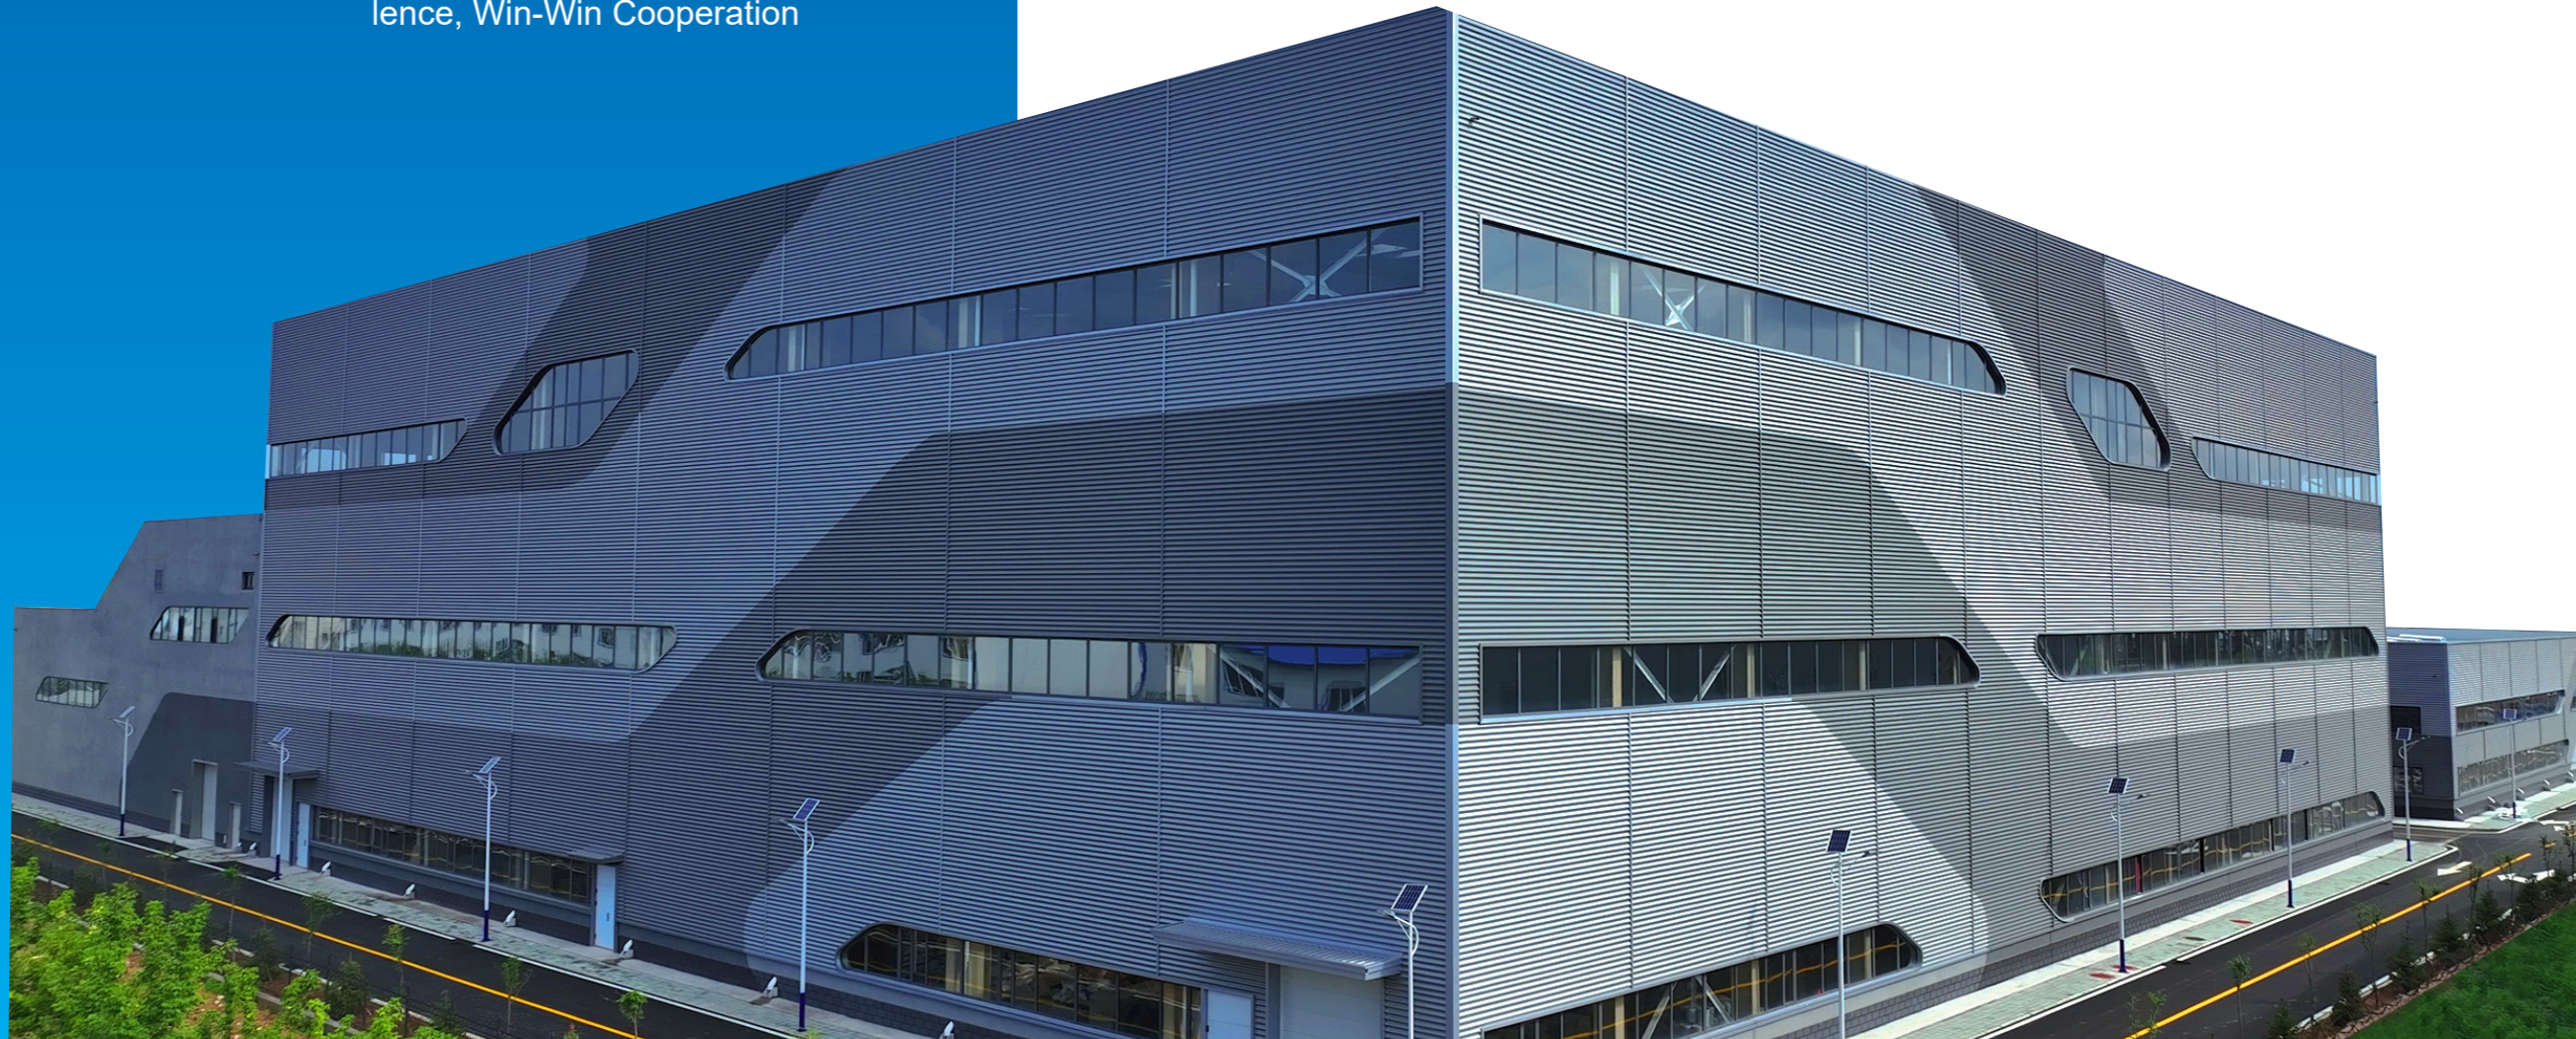

Eastan Biotechnology Group is a comprehensive pet food industrial group integrating R&D, production, sales and after-sales services. It owns three professional pet food manufacturing bases — Qingdao Eastan Bio-technology Co., Ltd., Liaoning Haichen Organic Pet Food Co., Ltd. and Liaoning Anew Animal Nutritious Food Co., Ltd. — as well as three self-operated brands: Black Nose, Dr. Cat and Natureplus.

As the only pet food enterprise in the industry cooperating with shareholders from China's Top 50 Broiler Slaughter Enterprises (Wens Holdings, Wellhope Agri-Tech, Jiuguhe Group), all three of its production plants have obtained four major ISO system certifications. We adopt production and quality control processes that exceed national standards, and our products fully comply with three authoritative standards: GB (Chinese National Standard), AAFCO (U.S.) and FEDIAF (EU).

The company strictly implements production and quality management in accordance with human food safety standards, as well as ISO22000, BRC, FDA and HACCP standards. We provide customers with product development and OEM production services, and our products are exported to more than 50 countries and regions, including the United States, Germany, France, the Czech Republic, Turkey, Japan and South Korea.

We are not only pet food producers, but also pet lovers and pet parents who regard pets as an indispensable part of our family. In addition, we respect and value every customer as a member of the Eastan family. At Eastan, we take great pride in the natural, high-quality products we craft.

Warmly welcome you to join our Eastan family, and work together to create a "healthy life for humans and pets"!

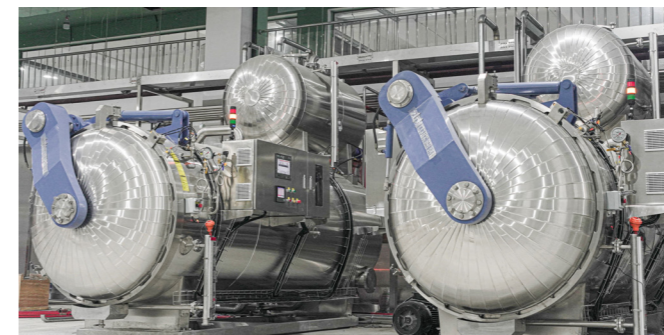

Haichen Organic: A Trusted Global Provider of Pet Health Food, and a comprehensive pet food processing enterprise with dual domestic and international organic certifications. Since settling in Kazuo, Liaoning in 2015, leveraging years of experience in high-end pet food R&D and production, it has deeply rooted in the unique organic ecological environment of the world's golden agricultural and pastoral belt at 41°N, dedicated to providing one-stop, full-category green pet food R&D services for brands.

To date, Haichen Organic has three production workshops with a total area of about 63,647m², including a 46,000m² 5G intelligent factory. Equipped with a full set of 5G intelligent equipment — such as automatic enzymatic hydrolysis, spray drying production lines and automatic e-commerce logistics warehouses — it further enhances production capacity and efficiency through digital intelligence, better meeting consumers' demand for high-end pet food.

Customized Premium Food · Organic Power. Haichen Organic has built a green OEM/OCM ecological closed-loop system covering high-quality pet food R&D, verification, production and service, and established long-term cooperation with over 1,000 well-known global brands. We look forward to partnering with more peers to drive the high-quality development of the pet food industry and build a healthy, beautiful life for humans and pets.

An affiliate of Eastan Biotechnology Group, Liaoning Anew focuses on industrialized fresh pet food. Based in Tai'an County, Liaoning, it integrates into the local billion-level fresh ingredient industrial chain, building a controllable and traceable fresh pet food industrial chain. Covering 146,000 m² (53,000 m² for Phase I), the factory plans 8 production lines (4 metal can lines and 1 each for flexible packaging, cat strips, aluminum foil boxes and jelly cups). Upon completion, it will be Northeast China's largest base for pet wet, extruded and baked food. Its flexible can lines (150 cans/min) fit multiple sizes, supported by auxiliary lines for mass production.

Built to GMP standards, it has full-process automated lines and sterilization systems (including HPP), meeting FDA, BRCGS, ISO9001 and ISO22000 certifications to ensure product safety and consistent quality.

Leveraging 41°N golden agricultural belt resources and the Group's 15-year experience, Anew has a closed-loop from raw materials to finished products, offering stable product upgrading support. Around 40% of products are exported to the EU and Middle East; it also provides OEM services for leading domestic brands.

FACTORY CAPACITY

SITUATED ALONG THE 41°N LATITUDE, THIS REGION IS A GOLDEN AGRICULTURAL AND PASTORAL BELT FREE FROM INDUSTRIAL POLLUTION
